

# GREEN ANODE PASTE PLANTS: PARTS & SERVICES

**BUSS ChemTech offers genuine OEM spares and comprehensive services for all of our Green Anode Paste Plants worldwide ensuring continued production of high quality anodes well into the future.**

Using high quality original parts from BUSS ChemTech ensures smooth and continued production with peak performance and durability. In collaboration with our clients and strategic supply partners, we continuously engage in development efforts to further improve the quality of our OEM spares.

## SPARE PARTS OFFERING

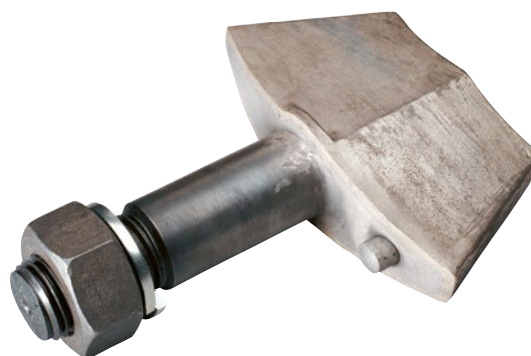

- OEM parts incorporating the latest design innovations
- Your choice in wear protection (standard, high and ultra-high) allowing a customized product to fit your specific needs
- Delivery from stock for the most common spare and wear parts
- Responsive field service
- Service and maintenance contracts

Our highly skilled and experienced engineers and technicians are available to provide you the highest level of support to execute your inspections, process studies, training and all kind of technical support whenever, wherever you need it.

## ADVANTAGES OF OEM SPARES FROM BUSS CHEMTECH

- First class OEM spares for your anode paste kneader
- High operating life
- Low maintenance costs

BUSS ChemTech delivers first class customer support worldwide, ensuring fulfillment of ever-increasing production demands. Since our entry into the anode market in the early 1950's, we have concentrated on machine optimization, maintenance services and establishing a worldwide spare and wear part supply. All of our OEM spare parts undergo a standardized and strict quality assurance process to ensure continuous, long and trouble-free operation.

Original BUSS ChemTech parts for a Paste Kneader.  
From top: wear plates, inner flight, outer flight.
