Introducing our new Business Development Manager for North America

We are excited to introduce **Ms. Aida Aranda** as our new Business Development Manager for North America. With over 20 years of experience in the chemical industry, Aida has a proven track record of building strong, lasting relationships and helping businesses like yours achieve their strategic goals.

In her new role, Aida will be your primary point of contact for any inquiries related to our technologies in the region. We are confident that her expertise and commitment will add significant value to our service offering.

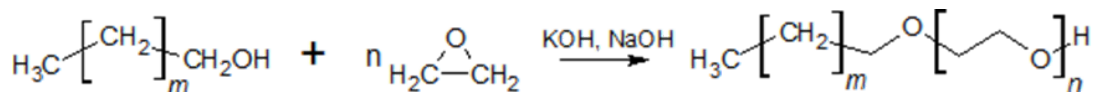

Please feel free to reach out to Aida directly at aida.aranda@buss-ct.com or +1-630-340-6264. She looks forward to connecting with you, learning more about your business, and exploring how we can support your path to success.

Thank you for your continued trust in Buss ChemTech. We are excited about the opportunities ahead!

DID YOU KNOW...

that Buss ChemTech's Buss Loop Reactor (BLR) is particularly suitable for **ALKOXYLATION** reactions?

Our technology helps to safely handle the energy released by these exothermic reactions as well as the increase in volume, while maintaining a smaller reactor footprint and with higher efficiency than other alkoxylation technologies.

Our engineering design includes effective **safety features** to handle the explosion risk and provide proper reaction control.

Reach out to learn more about our technology offering:

Gianluca Premoli / gianluca.premoli@buss-ct.com / +41 (0)61 825 6373
